EXPERIENCE

Backend Developer Intern

V-Ex Tech Solution

Jan - Apr (2024)

As a backend developer intern with a solid grasp of frontend development, I played a key role in the development of an e-commerce website. My tasks encompassed crafting robust backend functionalities, ensuring seamless communication between the server and client-side components, and architecting an intuitive admin panel for efficient management.

PROJECTS

Scan Application

For university project created flutter based application that scan the barcode of the products and add products in cart for purchases.

Asistant

For university project in diploma created a basic android based personal assistant which can search using voice commands , make phone calls and open applications in mobiles.
